SUBJECT	Introduction of our company's team

We are students in our third year of baccalaureate in Polo Educativo Montevideo, and we made a fictional company called NodeBridge with the objective of graduate..

NodeBridge is a software developer company, with the objective of using all the skills that we learned and keep learning. Such as technical skills, soft skills and english skills.

Our main project this year is the creation of a system, with 2 modules, in the first module we have to make a system who let upload files and organize it in different sections. In the second module we have to add a gps t

NodeBridge is a software developer company with the objective of showing the world what we, as students, are capable of.

Our main project this year is the creation of two systems which will help the administrators of the "Hospital de Clínicas" to organize their work.

Our team is composed by, Brian Fernández who is in charge of the Front-End design, Andrés Silva as a programmer manages the Back-End, Nahuel Pereira is the deputy coordinator and Ariel Morena as the coordinator.
